

OUR MOTTO

We aim at providing premium quality software products and software development services at unmatched cost-effectiveness and service quality, thereby making technology beneficial to your business. We value utmost professionalism, thus providing the best possible service to customers at the right location and at the right time.

COMPANY OVERVIEW

MALUS TECHNOLOGY PRIVATE LIMITED is associated with providing software solutions to a diversified client base. Our company essentially caters to software solutions for corporate clients in the areas of manufacturing, banking, sales & distribution, supply chain management, HR, travel industries and different institutional software requirements. Alongside, the company has also developed and tested marketable software products and solutions. We have a successful track record in customer satisfaction and our services have always met with the client prerequisites.

We have always aimed at providing cost-effective customer solutions without compromising the service quality. We implement the philosophy of 'Innovation', thereby helping clients to "Do Business Better". Our path-breaking innovations and ideas have culminated into a process which directly impacts customer benefits, by improving time-to-market, enhancing predictability and reliability, and cutting costs.

We deliver winning business outcomes through our deep industry experience and a 360 degree view of "Business through Technology" - helping clients create successful and adaptive businesses. We, as a brand, are recognized for its comprehensive portfolio of services, a practitioner's approach to delivering innovation and an organization wide commitment to sustainability. Our customer experience based solutions have enabled organizations in creating a consistent multi-channel brand experience and enterprise customer engagement & loyalty.

OUR SERVICES

We provide an assorted range of application software in web and client server technologies, system integration and database management.

We offer a blended model of 'Onsite-Offshore services'. In an industry where technical competence matters most, we realize how critical it is to choose the best and make them available to our customers at short notice. With this in mind we have put in place a stringent process of selecting professionals and maintaining them in a databank according to their skills and availability.
